SlimLine
The new slim dryers from Miele

SlimLine High throughput capacity in new format

Forever better

Miele is the epitome of quality. For 111 years, Miele has subscribed to a corporate philosophy of being 'forever better'. A quality promise that stands for perfect systematic solutions in laundry care. All Miele products are developed and manufactured to meet the highest of quality standards. The new slimline tumble dryers make consistent use of innovative technology and clearly underline Miele's role as technology leader.

Compact size combines with high capacity

Thanks to their compact size, the new slimline dryers are particularly suited to applications where space is at a premium and there is insufficient room to install a bigger dryer. With a capacity of 12-15 kg of laundry, these machines meet the calls for efficient and professional laundry care in cafés, restaurants and coin-op laundrettes through to large in-house laundries in care centres or as a machine dedicated to processing special batches in commercial laundries.

Efficient laundry care

Tumble dryers from the slimline generation are available as gas or electrically heated versions. Thanks to low energy consumption and its energy-saving potential, the use of gas makes sense both in economic and ecological terms. Even if additional installation costs apply, this investment pays its way in a short period of time.

Miele added value

NEW

Slimline dryer from the PT 8000 series
Load capacity 12 – 15 kg

New from MIELE

PT 8301 slimline dryer

- Vented dryer
- Load capacity 12 – 15 kg
- Profitronic B controls, time controlled with 4 temperature settings
- Galvanised drum, drum volume 300 l
- Heating: Electric or gas

Outer panelling

- Octoblu front with octoblu side panels, or
- Octoblu front with galvanised side panels (ideal for multiple side-by-side installations)

New from MIELE

PT 8301 COP slimline dryer

- As per PT 8301, but with Profitronic B COP controls, without time selector, for connection to external control units and payment systems, e.g. in coin-op laundrettes.

New from MIELE

PT 8303 slimline dryer

- Vented dryer
- Load capacity 12 – 15 kg
- Profitronic B PLUS controls, residual moisture sensing, 12 programmes
- Patented PerfectDry moisture sensing system
- Galvanised drum, drum volume 300 l
- Heating: Electric or gas

+volumeplus

A capacity that defines its size.

- Slim build, huge performance
- 300 l drum with 12 - 15 kg load capacity

+powerplus

A performance that offers more.

- Higher air throughput and intelligent air flow for fast drying
- Powerful electric and gas heating

+flexplus

A process that adapts to all situations.

- Three sets of controls for different target audiences
- Various casing designs to meet individual needs

+formplus

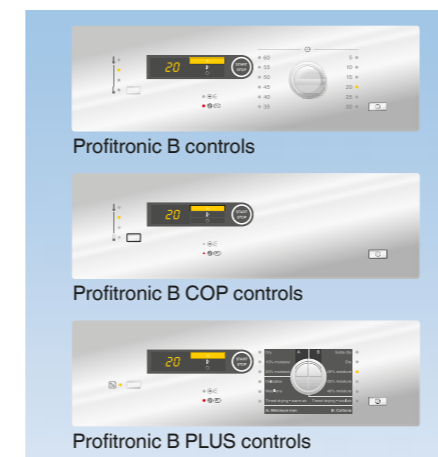

A concept that leaves a lasting impression.

- Product design to enhance ergonomics and handling
- Large porthole door for fast loading and unloading

+brandplus

A strong brand.

- High self-build content on all products
- High quality standards
- Wide range of services including pre-sales advice, planning, training, economic feasibility studies, financing through to after-sales service

Miele programme controls

These new tumble dryers are characterised not just by their compact design but by their flexible and simple user interface. Customers can choose from 3 control sets to cover a broad range of applications. Miele's Profitronic B and B COP [Coin Operation] is available for time-controlled programmes. Profitronic B Plus with 10 fixed and 2 time-controlled programmes as well as the 'Low temperature' function covers the range of moisture-controlled applications.

Always an answer to fit the bill

The new slimline dryers from Miele Professional represent the ideal solution wherever site access is impaired. With their compact width of only 711 mm, these machines fit through standard doors and can be installed on the smallest of footprints. The open plinth facilitates fork-lift handling. Optionally, the plinth can be covered with a toe-kick panel.

Optimum drying results

All slimline dryers feature diagonal drum air flow. This increases the exposure of tumbling laundry to the hot air, resulting in even more intensive yet gentle drying.
